The tcount of Job Satisfaction (X1) was 3.678 with ttable of 2.05183 because tcount ( $3.678 < 2.05183$ ) then  $H_0$  was rejected and  $H_a$  was accepted, meaning that there was a significant influence of Job Satisfaction on Employees' Performance while tcount Work Environment (X2) of 2,920 with ttable of 2,05183 because tcount ( $2,920 > 2,05183$ ) then  $H_0$  was rejected and  $H_a$  was accepted, meaning that there was a significant influence of Work Environment on Employees' Performance of PT. Permata Finance Baturaja Branch. The Fcount value of 78.058 was then compared with Ftable at the 95% confidence level or  $= 5\%$ , the F table was 3.35. So  $F_{count} > F_{table}$  where  $78.058 > 3.35$  then  $H_0$  was rejected and  $H_a$  was accepted, meaning that simultaneously there was a significant influence between Job Satisfaction (X1), Work Environment (X2), together on the Employees' Performance variable (Y). The value of the coefficient of determination (R square) in this study was 0.853 which showed the understanding that Employees' Performance (Y) at PT. Permata Finance Baturaja Branch was influenced by the variable Job Satisfaction (X1), Work Environment (X2) by 85.3% while the remaining 14.7% was influenced by other factors not examined in this study such as job satisfaction and organizational climate (Riduan et al, 2009 :290).
