WELCOMING SPEECH
PRESIDENT OF STKIP PGRI SUMATERA BARAT

The honorable:

1. President of Badan Pengembangan dan Pembinaan Bahasa, Kementerian Pendidikan dan Kebudayaan Republik Indonesia, Prof. Endang Aminudin Aziz, M.A., Ph.D.
2. President of Perkumpulan Pengelola Jurnal Bahasa dan Sastra Indonesia dan Pengajarannya (PPJB-SIP), Dr. Indrya Mulyaningsih, M.Pd.
3. Dean of Pendidikan Bahasa dan Sastra Indonesia, STKIP PGRI Sumatera Barat, Dra. Indriani Nisja, M.Pd.
4. Keynote Speakers:
 - Ku-Ares Tawandorloh from Fatoni University, Thailand,
 - Ariff bin Mohamad from Universiti Pendidikan Sultan Idris, Malaysia,
 - Kundharu Saddhono from Universitas Sebelas Maret,
 - Indrya Mulyaningsih, from IAIN Syekh Nurjati Cirebon,
 - Sultan, from Universitas Negeri Makassar, and
 - Yulia Sri Hartati, from STKIP PGRI Sumatera Barat
5. For all Speakers and Participants

Assalamualaikum Warrahmatullahi Wabarakatuh.

Good morning, greetings to all of us.

Selamat pagi dan salam sejahtera untk kita semua.

Puji dan syukur yang tiada hentinya kita ucapkan puji serta syukur kita kehadiran Allah SWT. Atas izinnya, Alhamdulillah, walau dalam situasi pandemi dan dilakukan secara virtual, kita masih dapat beraktivitas dalam Seminar Internasional berbahasa Indonesia “**International Seminar on Language, Literature, and Education (ISELL-ED)**” dengan tema “**Language, Literature, Language Education During the Covid-19 Pandemic**”. Terlaksananya Seminar Internasional berbahasa Indonesia ini, tidak terlepas atas Peraturan Presiden (Perpres) No 63 Tahun 2019 tentang Penggunaan Bahasa Indonesia pada forum internasional, baik dalam

ataupun luar negeri. Jadi berdasarkan Perpres tersebut, maka kegiatan ini juga dilaksanakan dalam bahasa Indonesia.

Adalah suatu fakta bahwa bahasa itu dinamis. Ini terlihat dari terjadinya perubahan-perubahan dalam berbahasa itu sendiri. Apalagi di era 4.0, dimana kita dituntut untuk mampu mengendalikan situasi khususnya terkait dengan kebahasaan apalagi dalam masa pandemik Covid-19 saat ini. Jutaan bahkan miliaran kata atau istilah yang berkaitan dengan virus korona muncul dalam satu klik jika mencari di mesin pencari Google. Kata Covid-19 diperoleh 4,69 miliar hasil pencarian hanya dalam waktu 0,46 detik. Yang menjadi catatan adalah kata-kata atau istilah tersebut lebih didominasi kata-kata atau istilah berbahasa asing. Barangkali hal itu menunjukkan bahwa bahasa Indonesia harus berjuang lebih keras lagi jika ingin menunjukkan keberadaannya di tengah gempuran bahasa asing, khususnya Inggris, dalam mesin pencari Google. Perjuangan yang sangat berat.

Pakar atau ilmuwan meneliti dan mengikuti perubahan temuan dari virus baru ini tanpa membuat *press release* yang bisa diliput dengan bahasa media dan media menuliskannya, menghadirkannya ke depan publik dengan tergesa-gesa tanpa mempertimbangkan bahwa imbas dari informasi bisa berujung pembentukan perilaku masyarakat. Klaim ilmiah seperti penemuan obat Covid-19 yang dihadirkan kepada masyarakat hanya didukung dengan pembuatan *press release*, jarang disertai dengan bukti ilmiah melalui hasil penelitian yang diterbitkan di jurnal penelitian. Padahal penting meyakinkan publik bahwa penelitian untuk pengembangan obat, secara metodologi telah diuji sehingga kekeliruan dalam pengembangan penelitian bisa diminimalisasi melalui proses *review* dalam penulisan jurnal ilmiah.

Di tengah kondisi krisis seperti ini memang penting memberi harapan pada publik dengan peliputan seperti proyek pengembangan obat dan vaksin yang menampilkan grafik positif. Namun peliputan optimis pun mestinya disertai dengan data realistis dan mengikuti kaidah ilmiah. Salah satu media ilmiah itu adalah dengan seminar internasional yang luarannya Prosiding dan jurnal terakreditasi yang diusung oleh STKIP PGRI Sumatera Barat, Perkumpulan Pengelola Jurnal Bahasa dan Sastra Indonesia (PPJB-SIP) dan Badan Pengembangan dan Pembinaan Bahasa, Kementerian Pendidikan dan Kebudayaan Republik Indonesia.

Abstract

The purpose of the research is to find out students' perception toward Instagram Vlog in English Speaking classroom. Since University students had own difficulties in learning speaking skill, such as lack of vocabulary, grammatical structure and pronouncing the words in English. The method used in this research is a statistics descriptive analysis. The instrument used to collect the data is a questionnaire. The population of the research is all of fifth semester students of English Study Program at Baturaja University. The researcher used five points of Likert scale for analyzing the data from questionnaire data. Based on the result of the research, the research findings showed positive perception from the students toward the use of instagram vlog in improving their English speaking skill. The students agree that learning English speaking skill through instagram vlog is interesting thing because the use of instagram vlog makes their speaking experience more interesting (4.44), helps their grammar accuracy (4.00), find their weaknesses in English speaking skill (4.48), and learn to use their mobile for the beneficial activity (4.69). In conclusion, according to the average score of the questionnaire 3.26, it is classified as agree. It shows that the students have positive perceptions on the use of instagram vlog toward English speaking classroom.

Keywords: EFL students, perception, instagram vlog, speaking

Abstrak

Tujuan dari penelitian ini adalah untuk mengetahui persepsi siswa terhadap Instagram Vlog di kelas English Speaking. Karena mahasiswa memiliki kesulitan sendiri dalam mempelajari keterampilan berbicara, seperti kurangnya kosakata, struktur tata bahasa dan pengucapan kata-kata dalam bahasa Inggris. Metode yang digunakan dalam penelitian ini adalah analisis deskriptif statistik. Instrumen yang digunakan untuk mengumpulkan data adalah angket. Populasi dalam penelitian ini adalah seluruh mahasiswa semester V Program Studi Bahasa Inggris Universitas Baturaja. Peneliti menggunakan lima skala skala likert untuk menganalisis data dari data kuesioner. Berdasarkan hasil penelitian, temuan penelitian menunjukkan adanya persepsi positif dari siswa terhadap penggunaan instagram vlog dalam meningkatkan kemampuan berbahasa Inggris mereka. Siswa setuju bahwa belajar keterampilan berbicara bahasa Inggris melalui instagram vlog adalah hal yang menarik karena penggunaan instagram vlog membuat pengalaman berbicara mereka lebih menarik (4,44), membantu ketepatan tata bahasa mereka (4,00), menemukan kelemahan mereka dalam keterampilan berbicara bahasa Inggris (4,48), dan belajar menggunakan ponsel mereka untuk aktivitas yang bermanfaat (4.69). Kesimpulannya, berdasarkan skor rata-rata angket 3,26 tergolong setuju. Hal tersebut menunjukkan bahwa siswa memiliki persepsi yang positif tentang penggunaan instagram vlog terhadap kelas berbahasa Inggris.

Kata kunci: siswa EFL, persepsi, instagram vlog, berbicara

1. INTRODUCTION

Speaking is the most essential skill in language teaching and learning, especially in English classroom. According to Nunan (2001) speaking is a skill that which generally has to be learned and practiced. Speaking is considered a skill to practice and master. It is the ability to express something in spoken language, it is like a complex skill because at least it is concerned with components of pronunciation, grammar, vocabularies and fluency. Moreover, Burns (2012) defined that learning to speak in another language is a challenging undertaking because speaking is a highly complex and dynamic skill that involves the use of several simultaneous processes – cognitive, physical and socio-cultural – and a speaker's knowledge and skills have to be activated rapidly in real time.

The complexity of speaking skill refers to students speaking problem. The students need extra practicing activities guide by the educators. Ellis (2008) stated that lacking the chance to practice the language frequently and in different context may make the students struggle to develop their speaking skill. In addition, according to Tuan and Mai (2015) the problems that teachers can come across in helping students to speak in the classroom could be classified into four factors: inhibition, lack of topical knowledge, low participation, and mother-tongue use. Therefore, reducing students' inhibition, developing their topical knowledge, increasing their participation, and minimizing their mother-tongue use are the most important aspects to consider facilitating learners to master speaking. With the increasing importance attached to speaking as part of one's language competence within the Communicative Language Teaching paradigm, the teaching of speaking skills in foreign language learning has become a burgeoning area of research over the past two decades.

Moreover to the cognitive demand and other psychological factors, another challenge with speaking is that in the context where English is taught as a foreign language (EFL), learners have a limited number of opportunities to use the language outside of the class, if not any at all. Thus, language educators need to find strategies to extend the speaking practice out of class to expose their learners to the target language more, rather than merely rely on in-class activities and regular activities. As claimed by Thornbury (2005) that speaking is so much a part of daily life that we take it for granted. Therefore students' speaking skill needs to be developed and practiced day by day, especially on English day.

One strategy that may discuss in this research is the use of Video Blog or known as Vlog through instagram as a video sharing social media by watch and creates it. Vlog offers a richer experience than the sites with blogging in the form of text, because it combines video, sound, pictures, and text, increase the information content, and emotions which are shared with other internet users. In order to increase the amount of extensive practice of speaking skills out of class, to foster self-reflection, and to enhance learners' oral language skills, a number of multimedia technologies have been recently employed in language classes. The rapid development of technology and social media, they are facebook, twitter, blog, video blog, youtube, instagram and others, had been useful to support the language learning. It is considered as an alternative media that can increase students' skill and motivation. The most popular mobile application are youtube and instagram. While instagram is a mobile application that allows users to capture and share images and videos with followers (Instagram, 2015). It launched since 2010. Instagram collaborate with vlog or instagram vlog can accommodate speaking practices. According to Mutmainna (2016) one of the latest approaches of teaching and learning English is by integrating technology in the classroom environment. Nowadays, blog and instagram had become an exploding passion among social

media site. They are the most popular phenomenon among teenager students in every life as a friend for everybody.

There are numbers of studies related to the influence of vlog to the students' speaking skill and also related to the use of instagram as current trend in three recent years (Wulandari, 2019; Aqil & Fahri, 2018; Rahmawati et. al, 2018; Rakhmanina & Kusumaningrum, 2017). The previous research conducted by Wulandari (2019), this research found that the implementation of instagram vlog into a speaking class contributed to the improvement of the learners' speaking proficiency. Additionally, the analysis of the questionnaire demonstrated that the utilization of instagram vlog contributed EFL learners' on "enhancing fluency", "acquiring vocabulary items", and "boosting selfconfidence and motivation". Due to relatively short video duration, they were required to effectively convey their ideas maximizing their idea organization.

The media that familiar recently used to apply these vlogs are Youtube, facebook and instagram. One of the most popular Social Network that used by most of the students is Instagram. Students can used this social media to support their study. According to Blair and Serafini (2014) instagram is a social network based around sharing pictures, videos and some features which can be posted to te social media sites. Although several studies have explored the utilization of digital video recordings in foreign language speaking classes as a way of increasing learners' exposure to the target language, the majority of these studies either only focused on learners' perceptions of the incorporation of digital video recordings into speaking classes, or were conducted in an ESL context, where learners might have had many other opportunities to practice the target language. In order to have specific way in improving speaking skill, students significantly have strategies towards it. Based on the explanation above, the purpose of this research was want to find out the students' perception on the use instagram vlog in English speaking classroom among the fifth semester students of English Education study program, Baturaja University.

2. METHODS

The researcher has used the descriptive method in this investigation. The descriptive method used to analyze the gathered data objectively based on the fact that it would be found. (Sugioyono, 2010) explains the descriptive approach is statistics that using to analyze the data in ways that explain data that collecting as without intending to make a valid conclusion. The population on this research is the fifth semester students of English Education study program, with the sample 17 students and they were purposively selected. The rationale of choosing those participants was because all participants had been familiar with instagram vlog and they had been taught speaking English using instagram vlog. The research instrument used in this research was a questionnaire consisted of 16 items. The closed-ended statements use Likert-scale which related to the students' perception toward using instagram vlog in English speaking classroom. Questionnaire was constructed to answer the research question which is the perceptions of university's students of using instagram vlog in the classroom, relate to their English skill, and their motivation in speaking English. The questionnaires made use of the Likert scale ranging from 1= Strongly Disagree, 2= Disagree, 3= Undecided, 4= Agree and 5= Strongly Agree. Neag Centre for Gifted Education and Talent Development University of Connecticut (2007) states that perception affects emotions and behaviors and the emotional and behavioral reactions also help shape the environments and skew ones' beliefs about their environments. Questionnaire for the students give to know their feeling, opinion and thought using the media.

The data from the questionnaire were analyzed by using Likert Scale. The answering each instrument items of Likert Scale that divided into positive statements and negative statements. Positive statement scores Category (5) strongly agree, (4) agree, (3) undecided, (2) disagree, (1) strongly disagree and Negative statement score (1) strongly agree, (2) agree, (3) undecided, (4) disagree, (5) strongly disagree. To interpret the students' responds, the researcher used the interval estimate. The interval estimation was used the interval estimate. The interval estimation was used to measure the parameter of population based on the score of rates interval sample data that has 15 intervals estimate each level. In this case, the rating score was ranged 20 to 100 and the questionnaire levels were 5 levels or 5 categories. Thus, the researcher started to measure the score of strongly disagree (20) to strongly agree (100). Therefore, the researcher used 15 intervals estimate and as well as large enough score in order to minimize the error level or insignificant scores in measuring. Then, to calculate questionnaire data into percentage, the researcher used the SPSS program. The interval of the students' perceptions responds on the questionnaire can be seen in the table 1.

Score	Category
84 – 100	Strongly positive (very high)
68 – 83	Positive (high)
52 – 67	Moderate (average)
36 – 51	Negative (low)
0 – 35	Strongly negative (very low)

Table 1. Rating score of perceptions category

3. RESULTS AND DISCUSSION

Based on the percentage analysis of students' perception on the table 2, the analysis shows that there were no students who states negative statement to the use of intagram vlog, 9 students (53%) were strongly positive who get score in interval 84-100, 3 students (18%) were positive category in interval 68-83 and 5 students (29%) were moderate in interval 52-67, and none for negative and strongly negative category. The table 2 indicates the implementation of intagram vlog in speaking classroom is interested to the EFL students. This supported by the following table:

Category	Percentage
Strongly positive (very high)	25.00%
Positive (high)	69.74%
Moderate (average)	5.26%
Negative (low)	0.00%
Strongly negative (very low)	0.00%
Total	100.00%

Table 2. The Percentage of Students' Perception

The table 3 shows that the mean score of the students' perception is 72.03 which mean it is in a positive category according to the range of students' perception score. Therefore, the students have positive attitude to the use of intagram vlog in English speaking classroom.

No	Statements	Average	Classification
1	I think the use of instagram vlog helps me practicing my English speaking skill.	3.56	Agree
2	I think the use of instagram vlog helps me acquiring new English vocabulary.	3.12	Agree
3	I think the use of instagram vlog makes my speaking experience more interesting.	4.44	Strongly agree
4	I think the use of instagram vlog helps my grammar accuracy.	4.00	Strongly agree
5	I think the use of instagram vlog helps my pronunciation accuracy.	3.22	Agree
6	I fell more confidence to speak English, After doing the activity on making vlog in instagram.	3.16	Agree
7	It is easy to practice English speaking through instagram vlog.	3.10	Agree
8	I can practice English speaking more through instagram vlog.	3.53	Agree
9	I am very enthusiastic about speaking English through instagram vlog .	3.02	Agree
10	After learning by using instagram, my English speaking skill better than before.	3.21	Agree
11	Through this instagram vlog I find my weaknesses in English speaking skill	4.48	Strongly agree
12	Through this instagram vlog I find my strengths in English speaking skill	3.02	Agree
13	Through this instagram vlog I learn to use my mobile for the beneficial activity	4.69	Strongly agree
14	I prefer practicing my speaking in front of the class then in front of camera	2.72	Undecided
15	Speaking English through instagram vlog more enjoyable than traditional classroom learning .	3.38	Agree
16	It is difficult to make a vlog instagram because of the slow-speed internet on my mobile.	2.91	Undecided

Table 3. Students' Perception Questionnaire Result

As seen from the table 3, the students agree that learning English speaking skill through instagram vlog is interesting thing because the use of instagram vlog makes my speaking experience more interesting (4.44), helps my grammar accuracy (4.00), find my weaknesses in English speaking skill (4.48), and learn to use my mobile for the beneficial activity (4.69). In conclusion, according to the average score of the questionnaire 3.26, it is classified as agree. It shows that the students have positive perceptions toward learning English speaking skill through instagram vlog. This proved that the use of instagram vlog has a strong effect on the students' English speaking skill as supported by Rakhmanina and Kusumaningrum (2017) stated that vlogging as part of blogging trend lean towards to give a positive effect on developing learners' fluency, accuracy and accent. It was relatively easy to gain access to procedure of making vlog instagram because it is a well-known video sharing website where users can upload, view and share video. This was also due to the statistical

reports on official website those more than one billion visitors every month and thousands of videos and topics in many languages are shared and are available on Instagram. As stated by Anil (2016) that vlogging is prosperous, if the students have high interest in using tool as well as their interest in developing their learning skill.

4. CONCLUSION

From the finding and explanation above, the researcher can say that the use of Instagram vlog as leaning media is applicable for teaching English in speaking classroom. It indicated that the positive perceptions of the students to use Instagram vlog in learning English speaking skill. It can boost students' motivation by providing fun and accessible learning process. In addition, it promotes good students' speaking performance.

5. ACKNOWLEDGMENTS

This research is sponsored by Direktorat Riset dan Pengabdian Masyarakat Direktorat Jenderal Riset dan Pengembangan Kementerian Riset, Teknologi, dan Pendidikan Tinggi. It financed at 2020 year, researchers would like to express thank you very much and for LPPM Universitas Baturaja also indebted to the students of English Education study program, Universitas Baturaja for their support and cooperation.
