

## **ABSTRACT**

Tika Imelda (2024) The influence of third party funds, market risk and credit risk on profitability in state-owned banks listed on the Indonesia Stock Exchange for the 2018-2022 period. Under the guidance of Ali Akbar, S.E., M.Si and Tati Herlina, S.E., M.Si

The Influence of Third Party Funds, Market Risk and Credit Risk on Profitability in State-Owned Banks listed on the Indonesian Stock Exchange for the 2018-2022 period with 20 annual financial reports as research data, and the analytical method used was the quantitative method.

The research results showed that partially Third Party Funds (DPK) did not have a significant influence on profitability as evidenced by the calculated t value of  $1.609917 < t \text{ table } 2.11991$ , and partially Market Risk (NIM) had a significant influence on profitability as evidenced by the calculated t value  $2.830147 > t \text{ table } 2.11991$ , while partially credit risk (NPL) had a significant negative influence on profitability as proven by the calculated t value  $-4.103303 < t \text{ table } 2.11991$ . Apart from that, simultaneous testing showed the results that Third Party Funds, Market Risk and Credit Risk together influence the profitability of state-owned banks listed on the Indonesian Stock Exchange in 2018-2022, as evidenced by the calculated F value of  $26.24461 > f \text{ table } 3.24$ . And in testing the coefficient of determination, the Adjusted R Square value was 0.799438, which meant that 79.94% of the profitability variable was influenced by the Third Party Funds, Market Risk and Credit Risk variables, while the remaining 20.06% was influenced by other variables outside this research. .
