

SUMMARY

Bayu Dien Masroka. 2024. This research was carried out in Buay Madang Timur sub-district and Belitang Mulya sub-district, East OKU Regency. Both sub-districts have villages that have certified organic farmers and non-organic farmers. In this research, farmer data was taken during the 1st Planting Season in January and the 2nd Planting Season in May in 2023. The aim of this research is to analyze: 1. Income of organic and non-organic rice farmers. 2. Differences in income of organic and non-organic rice farmers in East OKU Regency

Based on the research results, it was found that the income from organic rice farming was greater than the income from non-organic rice farming, namely IDR 48,758,303 / Ha / Year, while the income from non-organic rice farming was IDR 24,574,281 / Ha / Year, The results of this research have been published in the Asian Journal of Applied Research for Community Development and Empowerment. Vol 8 (2024), No.2
